LEATHER (L)

SPECIFICATION:

Priority and care is given to ensure that the selected mould has avoided defective scar tissue, blemishes, scars or tan marks. Usually the most consistent parts chosen are from the hides, shoulder and butts.

The thickness of leather varies but is supplied between 2.4mm - 2.6mm and 2.8mm -3.00mm

General characteristics for use where shaft shows extreme wear. Good in limited lube areas.

**Registered in England 07549806
